

EXPERIENCE DELFT IMAGING'S HEALTHCARE ON WHEELS

All-in-one mobile clinics, optimised for on-site healthcare services. State-of-the-art healthcare solutions designed to be taken into remote and difficult-to-reach areas. Delft Imaging's mobile clinics are customisable to meet your specifications and needs, manufactured in selective layouts, sizes, and vehicle types including solar panel installations for continuous operation when electricity is unavailable.

<p>Tuberculosis</p> 	<p>The Tuberculosis X-ray Clinic is made for screening projects in harsh environments. Each clinic includes our compact solution, EasyDR digital X-ray system, and our Computer-Aided Detection for Tuberculosis (CAD4TB) software, where CAD4TB analyses a digital Chest X-ray and generates a score between 0-100 indicating the likelihood of TB.</p>
<p>Blood Donor</p> 	<p>The Blood Donor Clinic is equipped with the latest blood collection equipment and processing technologies. Each clinic can be installed with adjustable reclining seats, blood storage and blood cooling facilities.</p>
<p>Gynecology</p> 	<p>The Gynecology Clinic comes with a Canon Xario 100G ultrasound scanner offering a full range of applications in a small versatile system. Each clinic can be installed with an examination bench, fridge, counter and more.</p>
<p>Laboratory</p> 	<p>The Laboratory Clinic delivers on-site medical laboratory services. Each clinic includes a laboratory room including safety cabinet that offers the highest level of protection for operator and environment.</p>
<p>Eye Care</p> 	<p>The Mobile Eye Care Clinic takes care of on-site delivery of medical eye care services and examinations. Each clinic comes with a fundus camera and can be installed with our RetCAD artificial intelligence software to automatically detect the presence of Age-related Macular Degeneration (AMD) and Diabetic Retinopathy (DR).</p>
